Mind Diagnostics

YOUR SCHIZOPHRENIA SCREENING TEST RESULTS

YOUR SCORE IS

Low Risk

4 out of 156

Low Level of Experience Associated With Schizophrenia	0 - 11
Higher Levels of Experience Associated With Schizophrenia or Psychotic Disorders	12-156

Your results indicate that you have no, or very few, symptoms of schizophrenia.

Your answers to this schizophrenia screening test fall into the range which suggests that you do not have early signs of psychosis or schizophrenia.

If you notice that your symptoms aren't improving or get worse, you may want to bring them up with your doctor or someone who is supporting you.

This screen is not meant to be a diagnosis, or the elimination of a diagnosis. Only a trained medical or mental health professional can diagnose schizophrenia.
